

**SIMS**  
RECYCLING  
SOLUTIONS

## Maximizing Your Return Minimizing Your Impact

Remarketing used equipment both maximizes your ROI and minimizes your environmental impact. Based on a comprehensive evaluation of your assets and goals, we tailor the recovery process to provide the greatest return while protecting your interests.

To ensure your data security when reuse is a viable option we follow procedures in strict compliance with NIST SP 800-88 Guidelines for Media Sanitization. Our proficient technicians review each item, identifying those with resale value. Equipment is tested, cleaned, and sold into our well established reuse network. Unit tracking, retrieval of itemized parts, and customized reporting are just some of the personalized services available to ensure that your reuse and recycling program works for you.
