

USE THESE FIVE CRITERIA TO EVALUATE YOUR E-RECYCLER

There are many electronics recyclers who might not recycle at all, instead they resell valuable equipment and/or export items to developing countries. This could potentially expose your company to a range of data security, environmental and brand protection liabilities.

BEFORE YOU WORK WITH AN E-RECYCLER:

1. Review their statement of qualifications or compliance package.
2. Ensure data security is a top priority.
3. Discuss on-site and downstream environmental management.
4. Review capacity and processing capabilities.
5. Audit, Audit, Audit.

THE GLOBAL LEADER IN ELECTRONICS REUSE & RECYCLING

Let us prove why we are the best choice for the responsible management of your end-of-life electronics. Visit us.simsrecycling.com or call us at **800.270.8220** today.

Recycle Right. Recycle Now.
