

RECOVER MAXIMUM VALUE FROM YOUR ASSETS

Based on a comprehensive evaluation of your IT and electronic equipment, Sims Recycling Solutions will tailor the recovery process to provide you with the greatest return possible. The process begins with remarketing and providing additional processing services to meet your needs.

REMARKETING SERVICES:

REFURBISHING: Our skilled technicians review each asset carefully, identifying the completeness, functionality and technology level, which enables our resale staff to maximize your return. Remarketable equipment is cleaned, tested and upgraded as necessary.

DATA WIPING & REPORTING: All hard drives and memory storage systems are completely erased, preventing unauthorized access to proprietary information. At any point during the recovery process, we also can provide up-to-date reporting and audit trails.

THE GLOBAL LEADER IN ELECTRONICS REUSE & RECYCLING

To learn more about our remarketing capabilities visit us today at us.simsrecycling.com or call us at **800.270.8220**.

Recycle Right. Recycle Now.
